

Introducing NorthWrite

Join a time-tested partnership proven to save **you** time and money.

NorthWrite

We know it's important to you to pick a partner who is in it for the long haul. NorthWrite was founded 15 years ago. We still have our very first customer—a mechanical contractor in Minnesota who uses our software every day in their business. Our goal is that, in another 15 years, they will still be our customer—and if we do our job right, so will you!

From our very first customer, NorthWrite has grown—we now have customers in every state and Canadian province and on three continents.

We help our customers manage over 10,000 buildings of every size and type imaginable.

Our customers are small business owners and Fortune 100 corporations. They are school districts, cities, states and the Federal Government. They are property managers, healthcare facilities and restaurant franchises. They are utilities who provide our software to their customers to help them track and save energy. Why did all these customers choose NorthWrite? Certainly, they liked our technology, and of course our pricing is always competitive. However, many of our customers tell us that they chose NorthWrite because they know we'll be here next month and next year!

Our two founders have over 50 years of collective experience in energy efficiency and building management. NorthWrite has a long history of working with the U.S. Department of Energy, our national laboratories and market-leading utilities to develop and commercialize leading-edge, energy saving technologies.

With NorthWrite, you have a partner who knows how you think. One who understands that the best operating buildings

are ones you don't even notice—because you're always comfortable, leaving you to focus on your business, your customers and your life.
